

programming 2

Methods

main method

Take 3 numbers from the user

Sum

average

print the results

Syntax.

Public static return type method name (Parameter List)

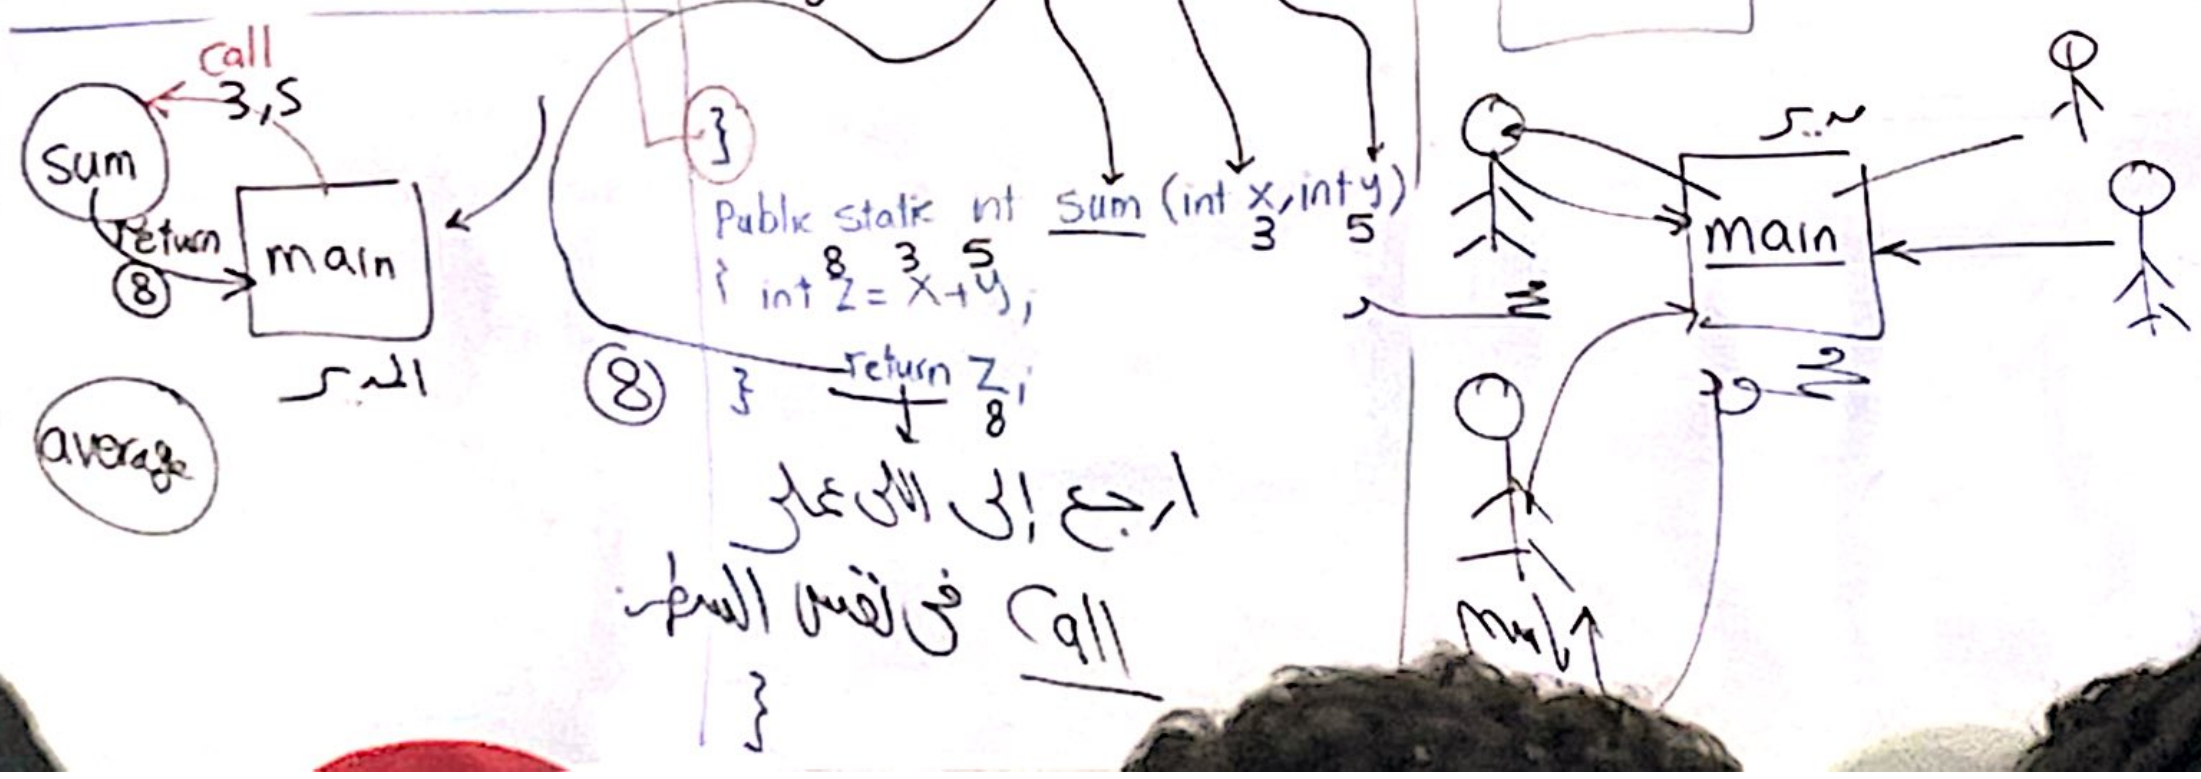

```
{  
    _____  
    _____  
    return _____;  
}
```

EX:

```
Public static int Sum (int x, int y)  
{  
    int Z = X + y;  
    return Z;  
}
```

```
Public Static Void Sum (int x, int y)
{
    int Z = X + y;
    System.out.println(Z);
}
// no return type
```

```
Public class entry point of the project
{
    Public Static Void main (String[] args)
    {
        int K = Sum (3, 5);
        sy - (K);
    }
    Public Static int sum (int x, int y)
    {
        int Z = X + y;
        return Z;
    }
}
```

Public class —————

```
1 public static void main (String[] args) {  
2     display();  
3     System.out.println("Prathal Jaiswal");  
4     display();  
5 }
```

Public class ————— entry point of the project

```
1 public static void main (String[] args) {  
2     int M = sub(9, 21);  
3     System.out.println("2AM");  
4     display();  
5     System.out.println("Sub(3, 7)");  
6 }
```

```

public class _____ entry point of the project
{
    public static void main(String[] args)
    {
        int M = sub(9, 21);
        System.out.println(2 * M);
        display();
        System.out.println(sub(3, 7));
    }
}

```

```

public static int sub (int x, int y)
{
    return y - x;
}
// int int

public static void display ( )
{
    System.out.println("Hello");
}
}

```

Public class —

```
1 public static void main (String[] args)
```

```
2 { display();
```

```
3   system.out.println("Java");
```

```
4   display();
```

```
5 }  
6  
7 public static void display()
```

```
8 { system.out.println("lecture");
```

```
9 }  
10
```

lecture

Public class —

```
1 public static void main (String[] args)
```

```
2 { int M = sub(9, 2);
```

```
3   system.out.println(M);
```

```
4   print();
```

```
5   system.out.println(sub(3, 1));
```

```
6 }  
7  
8 public static int sub (int x, int y)
```

```
9 { return y - x;
```

```
10 }
```

```
11  
12 public static void print ()
```

```
13 { system.out.println("Hello");
```

```
14 }
```

```
15 }
```

```
16 }
```

```
17 }
```

```
18 }
```

```
19 }
```

```
20 }
```
